

## Flags

Every country has a national flag, and some have multiple flags that represent different parts of their national identity. Emblems are often used as national symbols too, that can be reflective of native plant or animal species.

*ACTIVITY:* Look at these three flags below that represent Australia. Can you describe the meaning of each part of each flag?

*ACTIVITY:* Draw a new flag you would like to represent your country, using anything you want to e.g. symbols, images, colours. Write a short description under it.
